

INTRA COLLEGE TECHFEST

CODE RACE

Code Race is the primary coding event. It will predominantly test the participants' coding and analytic abilities, keeping in mind the different programming strategies concerned. Participants can register **INDIVIDUALLY** only.

This is a **SINGLE ROUND** event.

- Evaluation will be based on the runtime temporal and spatial complexity.
- Contestants can choose any of the three languages: **C, C++ or JAVA** to submit their solutions.
- In case of a standoff, analysis of algorithms and the execution runtime will be carried out.
- The number of problems and duration will be declared on the day of the event.
- Each individual may use only a **single computer**.
- Individuals may be asked to explain their solutions to the judges.
- The duration of the round will be approximately **2 hours**.
- External debugging tools or electronic devices may not be used.
- The coordinator may change the rules at any time.
- The contest environment and procedures will be announced on the event day itself.
- Decision of the judges will be final.
